Everything now Ready For the Big Stampede

Everything is now pretty well fixed up for the big Stampede to be held hereon July 1st. The only thing that now remains to assure the great success of the day is the weather.

Judging from inquiries coming from all quarters there will be a good list of entries for the 17 events on the program and hence competition may be expected.

The program at the stampede grounds will commence promptly at one o'clock with a list of athletic events for school children. There will be foot races for all ages and a bicycle race for all of which good prizes are offered.

Besides the Stampede, the Girls' Athletic Club is putting on a carnival morning and evening of the day. This will be held on the vacant lots at the corner of Broadway and Third street. Here there will be a variety of all kinds of attractions and good prizes. The carnival will also be held in the Crowe building on Friday and Saturday, June 28 and 29.

On the night of Stampede day there will be a big dance in Cliff hall. This means a full day of wholesome sport and fun. Come prepared to make a day off.

THE W. A. CONCERT WAS A PRONOUNCED SUCCESS

(Continued)

The grand concert in the Cannon theatre last Tuesday evening under the auspices of St. Ambrose W. A. was appreciated by all who had the privilege of being present. The music was given by Mrs. Hargrove and Mrs. Cooper was an unusual treat. Miss V. Cox and Mr. White also gave much pleasure. Miss Cox having found a bargain of a husband in a life store (by a dream). The Junior and senior girls did their parts to perfection. Little Miss Britt in her childhood was so sweetest herself. Mrs. Martin's singing meeting was just what Mrs. Kellott said: "It is a long time since we had a meeting like it." No one seemed to regret for the evening of a good laugh. Some one missed a treat.

HOT MEALS FOR THE

STAMPEDE

When in Town for the Big Stampede on July 1st bring the wife and family to the Club Cafe and get a good hot meal; the kind that will put them in shape to enjoy the big program.

Gardiner Government Decides to Hold on

In Spite of Defeat at The Polls Will Call Next Legislature

Although suffering one of the worst defeats at the polls in the history of any province in Canada, Premier Gardiner of Saskatchewan has decided to hold on to office until after the two deferred elections have been held and until the legislature is called together again. This will not be possible before some time in August.

In the Saskatchewan general election 26 Liberals were elected instead of an almost solid Liberal representation in the house before the election. The combined opposition to the Gardiner government elected 35 members. Of these 25 were straight Conservatives, 1 an Independent Conservative and the other nine Independents and Progressives. All of these 35 of the present opposition, defeated straight Liberal candidates. In view of these facts it is almost unbelievable that any leader of any party could have the nerve to even attempt to hang on to office for one minute after the official returns were reported.

Since there is little doubt that the Gardiner government will be defeated when the legislature does meet, the Calgary Albertan sums up the situation very aptly when it says: "It is hard enough to conceive how a defeated government can attempt to retain office after it has been told by the electors to clear out, but it is harder still to understand how it is harder still to understand how it can choose to add to its humiliation by asking to be told a second time."

PROMOTION FOR REDCLIFF BOY

Harold Oakland, who has been in the employ of the S. E. Gust stores Limited, for the past seven years, has been transferred to McLeod to take charge of the branch there for the same company. Harold is a former Redcliff boy, having spent his school days here. He entered the employ of Mr. Gust at the local store in 1922. A year later he was transferred to Melville where he remained until two weeks ago. It is a nice promotion for Harold as the McLeod branch is quite a large business he will be managing there and his responsibility quite heavy.

MAKE YOUR ARRANGEMENTS FOR SUMMER ICE

Call up the undersigned and make arrangements for your supply of ice for this coming summer. We will deliver to your house as wanted.

Churches

ST. AMBROSE CHURCH
Rev. J. L. Cooper

Fourth Sunday after Trinity.
Matins 10.
Choral Eucharist and sermon 11.
Children's service and address 5.
Evening and sermon 7:30.
The vicar and Mrs. Cooper expect to leave on Monday evening for a brief holiday at Banff. During his absence there will be one service at St. Ambrose each Sunday, the hour to be announced.

GORDON MEMORIAL UNITED CHURCH

Rev. W. D. Smith, Pastor

10 a. m. Church School. Lesson study, "A Psalm of Praise" Ps. 103. 11:15 morning worship. The sacrament of the Lord's Supper will be celebrated. All communicants are urged to be present.

7:30 Evening worship. Subject: "The Indispensable Church."

June 20th will be observed as "Patriotic Sunday." Special programs prepared by the Board of Religious Education will be used at the morning service.

The mid-week service will be discontinued till the month of September. We would ask the church members and Christian friends to consider carefully the question of church attendance during the summer months. You owe it to yourself, community and church to be present at the worship in God's house. It is much preferable for the people than for wooden benches. We are relying upon the members to be faithful in church attendance.

Swimming Pool To Open July 2nd

Ticket Sold Well and Hope to Make Some Improvements in Pool

So encouraging were the reports from members of the swimming pool committee at a meeting held last evening, that it was decided to get the pool in condition for opening up on Tuesday, July 2nd.

More interest than usual appears to be taken in the pool this year, probably due to the fact that there was a possibility of not opening it up unless more financial support was forthcoming and parents did not want their children's privilege closed.

An interesting amendment was made at the meeting when it was stated that all the industries in town had made a donation of \$10.00 each to the pool. The committee is desirous of installing a shower at the pool this season and to make this possible 60 more season tickets will have to be sold. As a shower is almost necessary it is hoped those who have not yet secured a ticket will do so as soon as possible.

FARMERS MUST BELIEVE

POOL WHEAT BY JULY 16th

The Alberta Wheat Pool has fixed July 15th as the closing date for the 1928-29 Pool. There are quite a number of Pool farmers who have still a little wheat on hand and they are advised this must be delivered by July 15th, otherwise it will go in next year's pool.

Redcliff Lads Win And Lose at Baseball

Top Good Games Played Here This Week

During the past week two baseball games were played here, and they were two snappy games out of which any bunch of fans could get quite a kick. The winner is that our boys here don't make arrangements for their games a little about and advertise them properly so that those who like the game would know about them and go to see them. With the class of ball these lads play we have not the slightest doubt they could go sufficient support to properly equip themselves with an up-to-date outfit and warrant them in drawing up a schedule with similar terms in the future.

The first game was played on Tuesday night between the Redcliff and the Melville teams. In his own side won out with a narrow margin of an innings to spare. The game Tuesday evening was played against the Greenhouse team and for the first time the score was a tie, one all. In their half of the seventh the visitors got in three runs and in the first of the eighth they made another, their last last up Redcliff got two more across the plate, leaving the score at the final 3 to 5 in favor of the visitors. Both were good games which were well worth seeing.

Stampede Meeting

A general meeting of the Stampede Association will be held in the Legion Club Rooms on Monday evening, June 24th at 8 o'clock. As this meeting is called for the purpose of making final arrangements and appointing officials for the Stampede a full attendance of all interested is urgently desired.

Redcliff Town Wins The McClellan Cup

Defeat Callies 1-0 In The Semi-Final of The Knock Out

In the final game of the McClellan Cup competition, played last Tuesday evening between Redcliff Town team and the Melville Callies, Redcliff won out by 1 goal to 0 thus winning the McClellan Cup for the second year in succession.

Although it could not be considered as high class as some played by the two teams this year. This was largely due to the fact that both teams were short of some of their regular players.

All the way through, the play was very evenly divided, no goals being scored till within a few minutes of the final whistle. This was scored by Mike for Redcliff on a nice pass from Mackell. Jack Hope in goal for Redcliff made some brilliant saves and was largely responsible for keeping the Callies down to a goose egg.

This game was in a knock-out series. The Callies won from the Legion and Redcliff won from the Brick & Coal. The game Tuesday was between the winners.

Applications Now For Old Age Pensions

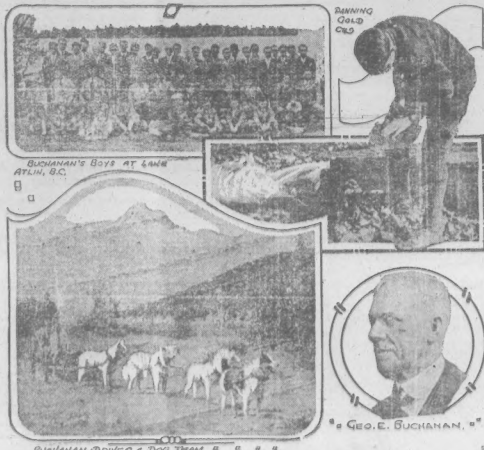

Forms Will Be Sent Out To Applicants Early Next Week

Application forms in connection with Old Age pensions are to be sent out in Alberta early next week, according to a statement just made by Alex Ross, chairman of the Workmen's Compensation Board.

It is stated that these forms will not be sent to applicants. Arrangements have been made for the secretaries of municipal districts, towns and villages, to handle the forms, while in Medicine, Lethbridge and Wetaskiwin, civic officials have agreed to take care of the applications. In Calgary and Edmonton the offices of the Workmen's Compensation Board will handle the forms. In unorganized districts the papers will be in the hands of the provincial police.

Members of the local Legion met in their club rooms last Monday evening for a farewell for Dr. Rogers who left the following day for his new home in Dawson City. There was good attendance and regrets were expressed on all sides on losing the doctor who has taken an active interest in the Legion's welfare on his visit. The doctor was presented with a fine pipe as a remembrance of his sojourn here. During the evening there was a musical program and it was most enjoyable. Hour was spent.

More Boys Planning to Make Buchanan's Alaska Tour

BUCHANAN BOYS AT HOME ALASKA, B.C.

George H. Buchanan, sponsor and leader of and route for the movement of boys to Alaska, is planning to take 50 or more to the far north the coming summer. Buchanan, who is president of the Detroit Coal Exchange and five coal companies and a capitalist, believes that a trip to Alaska, provides a boy partly covers his way, will be a wonderful formative incident in his life. He has already taken 200 boys to Alaska, and this will be his seventh annual personally conducted tour. The boys, aged 9 to 17, must earn cash of the cost of the trip (\$125.00); the parents advance a child and Buchanan loans the boy one third, which is to be repaid later at the boy's leisure.

Buchanan, who gets letters from all over the United States and Canada addressed "Alaska, Buchanan, Detroit," tells the boy who writes to him direct from anywhere how he can care his third by selling pens, kitchen tools, coal, steel gal baskets, etc. Boys who usually go westward through Canadian Rockies, swing Banff and Lake Louise, then north to Alaska on the "Princess Louise." They see the wonders of Alaska and return by the "Princess" to Vancouver and homebound through the United States, thus viewing the first scenery in Canada, Alaska and the States. Buchanan goes with them on every trip and gives them his personal care.

When asked what he did if they got sick, he declared that they did

Commercial Fertilizers Must Be Produced In Increasing Amounts To Maintain Present Crop Yield

The outstanding compilation to make that if the farmers of Canada were to entirely replace by chemical fertilizers the amount of plant food annually used it would entail a yearly expenditure of \$380,000,000. This figure, contained in a new report on "The Commercial Fertilizer Industry in Canada" prepared by the Natural Resources Intelligence Service of the Department of the Interior, at Ottawa is not intended to create alarm but is merely informative, as a matter of fact the compilation emphasizes the cultivated area of the Prairie Provinces where the soils are naturally very rich, and there is a division of opinion on the present need of fertilizers there. Without considering the three prairie provinces the fertilizer bill would nevertheless be very considerable amounting to over \$14,000,000.

The fact is stressed that such computations are theoretical and of no practical value except as pointing to the immense field open in time for the fertilizer industry in Canada. The aim of the report is stated to be to convince the Canadian public of the latest view of experts in world economies that commercial fertilizers must be produced in ever increasing amounts to maintain present yield and sustain a multiplying population and to show the amount of commercial fertilizer which Canada produces, might use, and may contribute to the world demand.

Contrasting with the value of the commercial fertilizer theoretically necessary to replace depletion of the soil is the actual figure of \$5,804,433 expended in Canada for commercial fertilizers in 1927. Though depletion of the soil is going on year after year the annual expenditure of fertilizer in Canada is not increasing rapidly as is shown by the expenditure of \$4,639,539 in 1918. It is held that there is a boundless field in Canada for the manufacture of commercial fertilizers but that to reach the full benefit of the growing market availing the industry the Canadian demand must be strengthened by education of the farmer, and in the rural schools, by practical demonstration of the value of fertilizers. Manufacturers, producers, and distributors need co-operation and the consolidation that other industries are finding necessary with a view to greater efficiency, uniform marketing and economy in production.

An interesting section of the 50-page mimeographed memorandum gives figures to show how the present low rate of yield of the larger crops compared with that in other countries might be profitably increased by the use of commercial fertilizers as advised by the Department of Agriculture. Prevailing tariffs and Dominion Acts regulating sale and manufacture of fertilizers are dealt with and "Why" indicates the location and names of producers of commercial fertilizers, and fertilizer materials whether wholly or partly manufactured in Canada. Copies of the publication may be obtained free of charge from the Director, Natural Resources Intelligence Service, Department of the Interior, Ottawa.

Brain To Spare
"We are given 10 times as much brain as we need. Very few persons use 60 per cent of their brains, many but 10 per cent," said Sir Hugh Keith, lecturing at the Royal College of Surgeons, London. He asserted that as a railroad bridge was constructed to carry a weight 10 times more than expected, so was the human brain.

Timber Consumption For Lumber And Pulpwood Compared

Figures compiled by the Forest Service of the Department of the Interior, advised a striking contrast of the manner in which Canada's forests have in late years been subjected to a heavily increasing demand for raw materials.

The timber exploitation in the manufacture of lumber has shown no

very pronounced upward trend in the last decade or so, but the advance of the pulpwood industry has been responsible for changing the whole aspect of forest utilization. Twenty years or so ago the yearly pulpwood cut expressed in terms of standing timber, was equivalent to hardly 20 per cent of the annual lumber cut. Today the timber consumption for

the main significance of this trend lies in the fact that with these two timber-using industries both develop

ed on a vast scale, the Dominion now has a vastly increased stake in good forest management. Forest conservation today should have been

from the beginning, a matter of common sense and incentive to support their ever

Leaning Tower Dispute Still Rages

Old Discussion Comes Up Again Regarding the Tower Of Pisa

Why does it lean?—that old old question reverberating around the tower at Pisa—is again the subject of violent debate in Italy, says the Italy-America Society. There used to be two schools of opinion: One held that the tower was intended to lean from the beginning, a masterpiece of the architect's; the other maintained that a subsidence of earth inadvertently caused the tilt. A third school is now busy converting the tower into a straight monument. The original architect, intended it to be straight. When actually built it began to lean. The outsiders then offset the leaning by continuing the construction of the tower to balance. All agree, however, that Pisa's tower is strikingly beautiful and safe.

It takes 1,500 tons to hold an automobile together, but it only takes one to spread it all over the landscape.

Some people would have to work overtime if they practiced half of what they preached.

A HARD PAR 4

Waging War Against Gophers

Bounty Offered By Alberta Department Of Agriculture

Cash prizes ranging from \$1 to \$200 will be paid by the Alberta Department of Agriculture for gopher tails and feet and eggs of crows and magpies taken in Alberta on or before November 1. A special feature has been added to the bounties this year, also for gophers and crows and magpies taken early in the season, on or before June 30. Feet of crows or magpies will be credited with five points each; eggs of crows or magpies will be credited with five points each and tails of gophers will be credited with three points each prior to this date.

Oil From Bituminous Sand

Alberta Government Will Undertake New Experiment

The Alberta Government intends to separate oil from a quantity of bituminous sand and to turn over to commercial institutions the oil produced in order that tests may be made, also to test the oil extracted in small quantities.

Many hopes for a fine score have been wrecked by hole No. 8 of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian Government has jurisdiction. It will be played from August 19th to 24th this summer. It is a dog-leg with a high knoll to be negotiated before the second shot can be placed on a sloping green that is lightning fast and guarded by a deep grass covered ditch. The outcome of this green is such that an error of a fraction of an inch in putting means disaster.

Co-incidence with the Canadian Amateur, the Western Canada Amateur will be played at the same time. The latter photograph shows the fairway just before the elevated tee. The hole in detail. Play in the tournament will take place from No. 4 tee.

Need Parking Place For Saskatoon

The Saskatoon Board of Trade is moving to develop the Hreslock Institute in the region to the point of being able to support a packing plant, Commissioner J. H. Holmes recently pointed to the large increase in stock shipments from the city as evidence of the growing need and necessity for a packing plant.

When bridge work is mentioned now you have to wait and see if it's teeth, cards, or viaducts.

Saskatchewan Wheat Pool Conducting A Survey Of Wheat Grown In Province

Enough Business For All

Hudson Bay Route Will Not Affect Eastern Or Western Ports

Vancouver is rapidly growing as a grain port. Last year there was handled through the British Columbia metropolis 80,000,000 bushels, and this year, before the season

will be passed, in 1928 the Government built a grain elevator in Vancouver. The politicians were

laughed at it and it was the built of paragraphs. For five or six years it stood idle. In 1914 the Panama

Canal was opened and the Government shipped an experimental shipload of grain via Vancouver and the Panama Canal to Europe. It proved a success. Since then the shipment of grain via Vancouver has steadily

increased until this year it will top the 100,000,000-bushel mark. Now all of Alberta's grain seeks the

markets of the world via Vancouver and Prince Rupert. The outlook is that all of the crop of the Peace River country will be shipped through British Columbia ports.

Despite this huge flow via Western ports, the Eastern Atlantic harbors have all the grain they can handle. The Western crop is so immense in size that there is not enough for all. Even if the Hudson Bay route proves feasible

for shipping of grain to Europe, there is no need of either Atlantic or Pacific ports worrying. The most serious threat to the market of the world's wheat is the

Depends On The People

Churches In Russia Closed Only When Majority Forces Change

Five hundred and thirty-two churches and 38 monasteries were closed in the Soviet Union in 1928. They were converted into clubs, public schools, reading houses, libraries and reading rooms, ambulances and hospitals, cultural centres, or museums.

Two hundred and fifty-three more places are marked for similar conversion this year, but there will be plenty left for religious purposes. A recent survey showed that there were some 50,000 churches in all of Russia.

The places of worship are closed to religious purposes only when a majority of the local population favors the change. A vote is taken if the initiative comes from local authorities. The 1928 list included 254 churches and 28 monasteries; 50 synagogues, 38 mosques, and 43 buildings belonging to various sects.

Vancouver Airplane Factory

New Concern Will Commence Operations At Coast City

Establishment of Vancouver's first airplane factory will be undertaken at once following the merger of Heffner-Beeching Shipyard Limited with the Heffner Aircraft Company of Canada.

Heffner, President of the British Columbia concern. The new company will be known as "Heffner Aircraft, Limited, of Canada."

It will be a Canadian concern, using Canadian labor and material, the engines being manufactured in Montreal.

Know That One

Real Wealth At Home

Canadian People Will Not Find Riches In Opportunities Elsewhere

In January, there were 4,364 persons who came to Canada as immigrants, and 4,327 persons left the country as emigrants.

Assuming that persons move from one country to another to improve their position in life, one is reminded of an utterance of an English writer, William Morris. In his recently published life of Frobenius, Mr. Morris remarks that while the Elizabethan adventurers were seeking gold abroad, and while Frobenius was taking back to England useless rock from Arctic islands, the real wealth of Britain was in the coal about one mile below the surface which Sir Martin was able to purchase in his late years.

Canada is a real land of opportunity. But unfortunately some of her people continue to think that opportunities are better in other lands.

OH BOY! LET'S GO!

I'll say so. I must start now and save up for it

Fighting Insect Pests in Canada

Estimated Cost Of Depredations Is Over \$100,000,000 Annually

The Dominion Entomologist, Arthur Gibson, estimated that in the aggregate insects cost Canada well over \$100,000,000 annually. This is the loss to field and fruit crops and to stock, must be added to the losses to forests and shade trees, stored produce, etc. While these latter losses are difficult to estimate they easily average over \$20,000,000 a year.

Insects are costly, their control one of the greatest problems with which any country is confronted.

The chief of the bureau of entomology in the United States recently made the statement, "It has become strikingly obvious that insects are collectively the most important enemies of humanity on the earth. It has become perfectly plain that if human beings are to maintain their hold on this globe, if they are to continue to exist, they must learn to control insects."

That seems to be the recognized situation, and to hear the Dominion Entomologist recant what has been done by the federal department of agriculture in an effort to control insects, shows that insects are fully alive to the seriousness of the situation.

The economy of such control work is well illustrated in the case of the Bark Beetles in Yellow Pine. These insects threatened the forests of yellow pine in British Columbia with complete destruction about six years ago. The federal and provincial departments of agriculture co-operated in control work and destroyed more than 50,000 beetle-infested trees. The cost of these operations amounted to \$100,000, and the yellow pine which stand saved from total destruction were worth \$6,000,000.

Another story might be written respecting grasshoppers, the Oriental peach moth, the apple maggot, fog insects, the pear psylla, apple bud-moth, woolly aphid, western codling moth, wireworms, cutworms, white grubs, etc. It is a case of war with the death—of the insects, in order that man may live.

The entomological branch is pre-eminence in every sense of the word, and the destructive insect and pest act, which the branch administers, is one of Canada's most important legislative measures, based as it is on the fact that the best way to control dangerous insect pests and plant diseases is to prevent their introduction.

Nations Must March Together

Britain Cannot Do All Debt Paying and Disarming Says Baldwin

"Foreign nations must not expect Great Britain to do all the disarming and debt paying," declared Premier Stanley Baldwin, in a campaign speech at Monmouth, when he discussed the work of the League of Nations.

"We are not the spirit of the League and covenant," he said. "We have all got to march forward together and we will march with the covenant, as we have the right to march. We are marching a little quicker at the moment, but the other nations cannot be lagging behind." The last thing we want to see is Europe split once more into hostile camps."

Alberta Gas Production

Engineer predicted by the department of the interior show that Alberta's natural gas output in 1928 to total more than 14,000,000 cubic feet. During the coldest day of the year, January 26, Calgary used 51,000,000 cubic feet, with a peak hourly demand of 60,000,000 cubic feet per day. On several other days of the same week approximately 48,000,000 cubic feet were delivered and consumed in the city.

It isn't what a woman says that influences a man, but the way she says it.

"With me it is the opposite. I have one foot longer than the other."—Montaigne, *Character*

W. N. U. 1747.

Helpful Hint To Gardeners

Vegetable Plants Should Be Thinned Out When They Are Small

Beginners in vegetable gardening are almost sure to make the mistake not only of sowing seed much too thickly, but also of leaving the plants too thick in the row. A very large amount of seed is wasted each year because of this, and failure to have plants develop properly is another result of more consequence to the sower of the seeds that the waste of seed. Thinning of all vegetables is desirable as soon as the plants are large enough to catch hold of, that is, quit being lettuce can be used even though the plants are thick, but the plants of lettuce should be thinned to five or six inches apart, and the plants of light lettuce should be thinned to eight inches or more apart. If they will not develop satisfactory heads if much closer than this. It has been found in the Horticultural Department, Ottawa, writes W. T. Macoun, Dominion Horticulturist, that the larger varieties of head lettuce give the most satisfactory results when the heads are nearly one foot apart. Carrots should be thinned to one inch apart, half an inch apart for two inches apart; parsnips to two inches apart; onions to one inch apart; spinach four to six inches apart. The plants of other vegetables are thinned as ready for use. Often too many kernels of corn are sown in the rows, and are thinned sufficient to leave after the cutworms and birds have taken their toll. Bean plants should be from two to four inches apart, and peas about one inch apart.

Vegetables will not develop satisfactorily if the plants are thickly crowded. In this case, thinning is very important.

The Realm Of Fancy

People Who Make Believe Escape From The Realm Of Reality

David Copperfield told us how he avoided himself in his lonely childhood by impersonating his favorite characters in the plays. He went about for weeks as a valiant Captain of the Royal Navy, in danger of being beset by savages, and resolved to sail his life at a great price. The Captain never lost dignity by having his ears bored with the Latin grammar, for he was a captain and a hero, in spite of all the grammars in the world. There are still hundreds of children who with an unseen pleasure, impersonate someone else for weeks at a time. The secret is often kept profoundly, for fear of ridicule; but the professor gets no salaries. Teachers make their living by private teaching while the students make their way by copying manuscripts or reciting the Koran. The teaching has been largely limited to the Koran, for it is an Islamic school. The plan runs from the school, church doctrine and decisions in church law affecting all members of that faith have long come from the university. The plan runs from the school, church doctrine and decisions in church law affecting all members of that faith have long come from the university. The plan runs from the school, church doctrine and decisions in church law affecting all members of that faith have long come from the university.

Something Was Flying

It had been a flying case for some time, and the plaintiff and the defendant were both so excited, and everything had had to be explained to them at least twice.

"I understood, my man," said the magistrate at one point, "that the defendant buried inventives at you."

The plaintiff scratched his head wildly. Then a look of understanding dawned in his eyes, as he replied, "No sir, to tell the truth, it was only bricks he threw at me; but what I complained about was the terrible way he swore at me when they missed."

Very Descriptive

It was visiting day at the inmate asylum. One of the inmates imagined himself to be an artist, and he was busy engaged with dabbling at an empty canvas with a dry brush. A visitor, wishing to humor him, asked what the picture represented.

"That," said he, "is a picture of the inmates being pursued through the Red Sea."

"Where is the sea?"

"Why, that's called back to allow the inmates to pass."

"They've just gone by."

"Then where are their prisoners?"

"Oh, they'll be along in a minute."

Teacher: "What is a prescription?" Jimmy O'Brien: "That's a piece of paper the doctor gives you and then you go to the drug store and get whiskey with it."

"I understand your son has been in Italy for some time."

"Yes, indeed he has become quite Italianized."

The Storing Of Eggs

New Methods of Handling Has Greatly Improved Quality Of Storage Eggs

This is the season of heavy egg production when stocks not required to be sold are being brought out into cold storage. In low the storage of eggs is greatly improved in recent years, so much so indeed that stored eggs are no longer looked upon with suspicion and doubt. Eggs that go into storage have to be submitted to the candling process which determines definitely their quality. Only those that are in prime condition are ever put away in storage quarters. The modern cold storage for eggs is a highly sanitary place not only in its cleanliness, but also by reason of the manner in which it is maintained. The temperature is held at all times close to the frost line and of such consistency with respect to moisture as to reduce evaporation to the smallest degree. Not only are the eggs graded when put in, but the regulations governing eggs covered by "The Live Stock and Live Stock Products Act," administered by the Department of Agriculture, at Ottawa, require that they should again be graded when they are brought from the storage chamber to go into commerce.

The usual egg cold storage in Canada is in the form of dry cold storage into which eggs are placed in their natural state. In Western Canada many of the eggs are put through an additional process before being placed in the storage quarters. The fresh eggs are immersed for an instant in a hot oil which not only sterilizes but seals up the shell, preventing evaporation from within and contamination from without. After treatment in this way the eggs are put through a band blast machine which removes the excess oil and restores the bloom of a fresh egg. They are then cold stored in the usual way. With the marketing of cold storage eggs, the losses from farms or out of storage, the losses from cold eggs have been almost eliminated in egg merchandizing.

Egypt Has Large University

Number Of Students Is To Be Reduced To Five Thousand

One of the biggest universities in the world, if it may properly be called a university, is that of Al Azhar, at Cairo, Egypt. It has no fewer than 14,000 students.

But the students pay no fees and the professors get no salaries. Teachers make their living by private teaching while the students make their way by copying manuscripts or reciting the Koran. The teaching has been largely limited to the Koran, for it is an Islamic school. The plan runs from the school, church doctrine and decisions in church law affecting all members of that faith have long come from the university. The plan runs from the school, church doctrine and decisions in church law affecting all members of that faith have long come from the university.

Nature a Good Provider

Natural gas from 250 miles away will soon boil the potatoes in San Francisco and other California cities brought thither through pipes welded at the joints so as to form a continuous line. Old Mother Earth is always a good provider if only a little co-operation is given her.

Hydro-Electric Energy

The daily average generation of electric energy from water power in Canada was 46,472,000 kilowatt hours in March, an increase of nearly 9 per cent. over the same month of last year.

"What is your son taking at the university?"

"All we can send him."

"Loan me five dollars, will you?"

"Sorry, but I have but four dollars and seventy-five cents."

"Well, give me that. I'll trust you for the other quarter."

Wolf: "The doctor said he would make a diagnosis of my case. What's a diagnosis?"

Lewis: "It's the Latin term for 'five hundred dollars.'"

"What is your son taking at the university?"

"All we can send him."

Bright Package

Little Sheila Watson, of Winnipeg, is very proud of the fact that she is a passenger on the "Metamora" at the age of three years. She has disguised herself as a "petal" and plastered herself with C.P.R. labels, but the one on her cap reads "Want ed," as one supposes she is.

The Value Of Suggestion

Rural Paintings Would Instill In Children Love Of Farm Life

Sea pictures have long been the source of inspiration to wanderers who have answered the call of the sea by going down to the sea in ships, reads an article in the May issue of "Successful Farming."

It is suggested that paintings of rural scenes, especially animals, may instill the desire in a child to become a farmer.

"It would seem that parents who are anxious of having their boys and girls remain on the farm, choosing a country environment in which to spend their lives, should not overlook the aid that certain pictures may have in influencing their children. Pictures of animals, and of landscapes that depict the peace, beauty, and charm of rural scenes are surely the most suitable for all lovers of the country to hang in their homes."

This type of picture has been painted by many great artists, and colored reproductions of them can be obtained at a very moderate price.

"There are so many suitable pictures that only a few can be named such as 'Horse Fair,' 'Ploughing,' 'Sheep,' 'Springtime,' 'Ow and Cat,' and 'Horses at Watering Trough.' Then there are the beautiful pictures of lovely landscapes that cannot fail to charm every lover of rural scenes."

With cattle, 'Harvest Waggon,' 'Berkeley Hills,' and 'Autumn Oaks'."

Nature a Good Provider

Natural gas from 250 miles away will soon boil the potatoes in San Francisco and other California cities brought thither through pipes welded at the joints so as to form a continuous line. Old Mother Earth is always a good provider if only a little co-operation is given her.

Hydro-Electric Energy

The daily average generation of electric energy from water power in Canada was 46,472,000 kilowatt hours in March, an increase of nearly 9 per cent. over the same month of last year.

The Illustration Stations

Purpose Is To Demonstrate The Varieties Of The Different Crops

Answering a question about the operation of the illustration stations supervised by the Experimental Farms Branch, asked by a member of Parliament in the House of Commons, the Hon. Dr. McPherson, Minister of Agriculture, explained that the government does not operate the 138 illustration stations distributed over Canada, but the Department does give its operators some assistance. He said, "The illustration stations or man's farm includes only that part of it fronting on a well travelled road and varies in area from eight or ten to forty acres. For the privilege of saying what crops shall be grown, what rotations shall be followed, and how and when cultural operations shall be performed, the Department pays the owner or operator a small amount (\$5 per acre) each year. The purpose of these stations is to demonstrate the varieties of the different crops, the cultural methods and the rotations, that have been found to give the best results on an experimental farm or station."

The illustration stations are judged to be similar to those which maintain on the illustration station under consideration.

"The crops harvested off these illustration stations are of course the property of the men operating them."

A Subject For Thought

Prejudice Against Immigrants From Europe Not Always Justified

Six years ago a Russian immigrant, Leo Malan, landed in Canada. He was utterly ignorant of English. Recently in Toronto, competing with fifteen Canadian-born boys of English ancestry, all champions of their district, he won the oratorical championship of Ontario. His subject, significantly enough, was "The Duties of Citizenship."

This should give us thought. We have people among us, well-intentioned and sincere, who would harp at immigrants unless from the British Isles. They may be right; but when one thinks about the young Russian, Leo Malan, and the subject of the discourse with which he achieved his triumph, it challenges thought.

After all, the great nations of the earth did not achieve their present status by keeping their breed pure. They are, on the contrary, a mixture of many races.

The application of a little history to some of Canada's problems might do a lot of good.—Ottawa Journal.

A Flattering Illusion

Bandy had recently had his photograph taken, and, being pleased with it, took it to show to a friend, at the same time asking his opinion. The friend looked it over very critically, and, casually remarking, "It's a flatterer, isn't it?"

"Flatterer?" said Bandy. "What makes you think that?"

"Well," replied the other, "I see you have your hand in your pocket."

Airplanes In Rail Survey

The Dominion government will send two airplanes to assist in the joint survey of the Pacific Great Eastern Railway, which is being made by the province of British Columbia and the Canadian National Railways and Canadian Pacific Railway.

Canada ranks third in importance as a source of metals of the platinum group, after Russia and Colombia.

Sulphur Dusting For Rust

Application Of Sulphur Greatly Reduces Loss From Rust

While infection by breeding of rust-resistant varieties of wheat is now regarded as the most faulty method of relief from losses from rust, it has been found that applications of sulphur dust to the growing crop will greatly reduce the rust infection. The 45-pound variety of the experimental farm at Ottawa has varied on dusting experiments in Manitoba. In 1926 preliminary experiments were carried out on a hard drawn duster. Further work was done in 1927. Marquis wheat was sown on June 10 in four-acre plots separated by seven-foot roads. Dusting began on July 18, and was continued for eight weeks. One plot was dusted twice a week at the rate of 15 pounds per acre. Another received weekly applications at the rate of 30 pounds per acre. In the third plot dusting was delayed until the 10th of August. It was then dusted at the rate of 15 pounds per acre. At each of these weekly applications the fourth plot was not dusted. The results of the dusting, and the results of an analysis of the grain, from the report of the division of botany of the experimental farms for 1927, the plots that received two applications a week of 15 pounds to the acre for eight weeks gave a much better crop than the undusted check plot. The increase in yield was 18.2 bushels to the acre of wheat that graded number 4, as compared with the undusted check plot. The low grade from the dusted plot was due to unfavourable weather conditions including frost. Even the plot that received the four weekly applications at the rate of 45 pounds to the acre, yielded 11 bushels per acre more than the check plot. From the standpoint of net returns the weekly applications of 30 pounds per acre were the most profitable. The net increase in value per acre due to dusting being \$12.28. While this excluded the cost of the dust, dusting can be depended upon as an economic practice, the experiment does show that applications of sulphur dust to the growing crop will sufficiently often will control rust in growing wheat.

A Big Wheat Field

Prairie Producers Produce Over Ninety Percent Of Wheat Grown In Canada

Throughout Western Canada farmers have been busy seeding one of the world's largest wheat fields. For it extends over about 22,000,000 acres. Last year the Dominion produced 133,571,700 bushels of wheat from 23,119,140 acres, over sixty per cent. of which was grown in the three prairie provinces—Manitoba, Saskatchewan and Alberta. This year it is estimated about 22,000,000 acres will be sown to wheat in Canada.

Wheat is one of the most important food products in many countries, and the Dominion is one of the world's largest wheat fields. Canada is the largest exporter of wheat and sells it to 47 countries.

The Dominion government will send two airplanes to assist in the joint survey of the Pacific Great Eastern Railway, which is being made by the province of British Columbia and the Canadian National Railways and Canadian Pacific Railway.

Canada ranks third in importance as a source of metals of the platinum group, after Russia and Colombia.

Vancouver Base of Large Coast Fleet

Tourist travel is showing an early upward swing on the Pacific Coast, with many travellers utilizing the splendid fleet of the British Columbia Coast Steamship Company. The above photograph taken in mid-April, shows the second largest pier on Granville Street waterfront, every inch of docking space occupied by Canadian Pacific steamers plying the triangle Vancouver-Victoria-Seattle route, and the Alaska West Coast and Gulf of Alaska route. Beginning at the left front of the pier, the ships are—"Princess Adelaide," "Princess Victoria," "Princess Mary," "Princess Royal," "Princess Elaine," "Princess Alice," "Princess Rona." The latter ship shown in the right foreground, is the new West Coast vessel which carried the recent vice-regal party on their coast cruise.

WORLD HAPPENINGS BRIEFLY TOLD

Dame Emilie Charlotte de Tasche, better known as Lily Langtry, left \$27,225.

Canada is the only Dominion that recorded an increase in British immigration in 1928.

Without explanation of the delay, the post office has delivered to Clifford C. Gilbert of New Haven, Conn., a letter mailed October 15, 1912, in Hartford.

After an illness of many months, Senator Robert Watson, 76, pioneer of the prairies, and for years prominent in western political circles, died at the home of his daughter, Mrs. J. Hutton McGregor, Brandon, Man.

Word of the death of Peter Richter, engineer on the first train to enter what is now Vancouver, on May 23, 1887, was received by D. C. Coleman, vice-president, Canadian Pacific Railway, Mr. Richter died at his home in Vancouver.

Harbor Improvement bills passed in the House totaled \$10,000,000 for Montreal Harbor; \$5,000,000 for Vancouver Harbor; \$3,000,000 for Halifax Harbor; and \$2,000,000 each for the harbors of Three Rivers and Chicoutimi.

The West Indies is considering establishing a trade mission in Canada, Sir Edward Dwyer, chairman of the West Indies conference, stated at Ottawa, Sir Edward is investigating trade possibilities in Canada.

Among the entrance scholarships awarded at Upper Canada College are: The Gordon Scholarship Number 1 (value \$600 a year for three years); Robert Kay Gordon, 15, St. Catharines, Ont.; Number 2 (value \$600 a year for three years); Edgar Standon, Edmonton.

Alberta Has Surplus

Close Tied Year With More Money Left Over Than Ever Before

Alberta closed the fiscal year ended March 31, with more money left over in the provincial treasury in excess of expenditures than ever before in the history of the province, \$1,817,671, the exact amount, according to an announcement made by Provincial Treasurer Hon. R. G. Reid. The surplus for the previous fiscal period, ended March 31, 1928, was \$270,763, covering 15 months, because of the change of the fiscal year dates adopted last year.

The Board Of Health

Strolling along the quays of New York harbor, an Irishman came across a wooden barricade placed around the enclosure where emigrants suspected of suffering from contagious diseases are isolated.

"Puh! this boarding for?" he enquired of a bystander.

"Puh!" was the reply "that's to keep out fever and things like that, you know."

"Indeed?" said Pat, "I've often heard of the board of health, but I never heard of this first time of seeing it!"

Cornia disappear when treated with Harnay's Corn Remover without leaving a scar.

Production Of Antibodies—Canadian scientists, which is of the chrysoic or serpentine variety, is practically all obtained from the Eastern Townships, Quebec.

INDIGESTION RELIEVED QUICKLY

The Food Vegetable Pills add nature's aid to the action of the digestive system. One of these little pills taken after meals or at bedtime will relieve you especially when you have overeating or are troubled with constipation. Remember they are Dr. Carter's Food Vegetable Pills. Adults, young and old can take them. All Druggists, S.C. and T.C. 25¢.

CARTER'S FOOD PILL

Will Search For Italia's Crew

Norwegian Vessel Is Fully Equipped

An Italian expedition headed by Gianni Albertini left Bergen aboard the Norwegian steamer "Sura", to look for the lost members of the crew of the Polar dirigible Italia, which crashed in the Arctic last winter.

The party of 18 men on the "Sura", which was formerly the Italian mail ship, will seek from Svalbard to Franz Josef Land for the so-called "Italian party"—the men who were carried away in the fog of the Italia after the crash.

The search is being equipped with sledges and dogs and wireless apparatus. The vessel stopped at King's Bay to take on more dogs before starting its long cruise. It is provisioned for 18 months voyage.

The "Sura" is fully equipped with sledges and dogs and wireless apparatus. The vessel stopped at King's Bay to take on more dogs before starting its long cruise. It is provisioned for 18 months voyage.

Italy Has Ambitious Road Building Program

Fifty Thousand Men To Construct Motor Highways

Because Premier Benito Mussolini has ordered it, Italy soon is to embark on the most ambitious road building program any modern European state has attempted—perhaps the largest since the famous road builders of ancient Rome took their art into battle. Within five years every corner of the peninsula will be accessible to the motorist. In all 40,000 miles of new motor highways are to be constructed. Fifty thousand men are to be engaged in working out the program.

The child in the home is a never-ending source of joy, but at the same time a never-failing responsibility to the fond mother. It not infrequently happens that minor ailments of the child distress and puzzle her. She does not know just what to do, yet feels them not possible to ignore. At such times as these it is found that Baby's Own Tablets are the mother's greatest help and friend.

Most childhood ailments arise in the digestive tract—the bowels are constipated and the stomach is full. Baby's Own Tablets are a never-failing relief for this condition. They are a mild but thorough laxative and through their action on the stomach and bowels they banish constipation and indigestion; break up colds and simple fever; allay the pain accompanying the cutting of teeth and promote health-giving sleep. Consulting them Mrs. W. Jennings, Mackay, Ont., writes: "I have used Baby's Own Tablets and think so highly of them that I would not be without them. Please send me your little booklet on the care of children."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Record Of Earthquakes—On the average over 200 earthquakes a year, or roughly one a day, are registered on the seismographs of the Dominion Observatory at Ottawa. The majority of these, however, do not involve any serious disturbance anywhere, and comparatively few originate in Canada.

No Askonia Remedy Like It. Dr. D. Schilling's Askonia Remedy is distinctly different from other remedies. While it is not a cure, it would not have continued its great record of relief until known to the world as a remedy for its wonderful cures of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

"Doctor, what shall I take to cure my asthma?" "Don't take anything."

Only those who have no worries can afford to look worried.

How To Dye An Old Rug

Successful Method That May Be Used In The Home.

Old rugs may be dyed at home in a practical manner reads an article in the May issue of "Successful Farming."

"First of all, spread the rug out flat and scrub thoroughly clean with one can of rug soap and water. Let it stand for fifteen minutes and then spray well with cold water from the garden hose, or rise with buckets of cold water. For a 3 x 12 rug use six packages of dye of the standard, well known brands of dye designated for silk and wool mixtures. Set the color with a half pint of vinegar, full strength. The rug will take the dye nicely while still damp but the drying takes some time."

Perish, pale, restless, and sickly children are their mother's worry. Mother Graves' Worm Expeller will relieve them and restore health.

A Logical Conclusion

Father—"Jimmy, why did you lick the little Jones boy?" Jimmy—"You told me to."

Father—"I told you to! Why, my son, what do you mean?" Jimmy—"Indeed you tell me the other day that it was more blessed to give than to receive."

Jimmy—"You told me to."

Jimmy—"Well, I had to give him a lick or two—well, one."

Four Hundred Years Ago

Luther's Catechism Is Still Being Used In Lutheran Schools

White text books change often and few studies today are a decade old, one yet in use to celebrate its four hundredth anniversary.

The Lutheran World Congress, June 20 to July 31, "Luther's Catechism" was written four hundred years ago, and still is used in Lutheran schools.

Luther's Catechism is the largest Protestant church its membership in the Dominion of Canada, and in 1900, mostly in Northern Europe and America. The three books translated into most languages in the world are: The Bible, in about 80 languages; "Luther's Catechism," in 137; "Tirgim's Progress," in 101.

The most translated hymn is Luther's "A Mighty Fortress," in 150.

A Munificent Gift

Mr. W. H. Askew, Of Scotland, Donates Large Sum To Aid British Colonization In Canada

The Department of Colonization and Development of the Canadian Pacific Railway announces a munificent gift on the part of Mr. W. H. Askew, of Ladykirk, Scotland, to the cause of British colonization in Canada.

Mr. Askew, who is a gentleman of means and well known in Scotland for his broad public spirit, has provided ten thousand dollars to enable certain families from the border regions of England and Scotland to emigrate to Canada and engage in agricultural work.

"Forty of these families are now on their way from Great Britain, and their departure has received wide publicity in the British press on account of the original circumstances under which these families are being moved."

The fact that Mr. Askew has provided ten thousand dollars makes possible, under the provisions of the Empire Settlement Act, an advance of a further ten thousand dollars for the forwarding of suitable British families to Canada. The Act in question authorizes the Secretary of State to co-operate with private organizations in formulating and carrying out schemes for affording relief assistance to suitable persons in Great Britain, who intend to settle in any of the Overseas Dominions. It is quite possible, therefore, that a small number of Askew's three hundred families may be emigrated to Canada.

The number depends on the precise amount advanced to each particular family.

At Mr. Askew's request, the Department of Colonization and Development, Canadian Pacific Railway, has arranged an agreement with the Secretary of State for Dominion Affairs, for the reuniting, placement in agricultural occupation, and all general administrative work connected with the scheme.

The families which will arrive during the week-end will be distributed on arrival in Canada in places which have already been assigned; twenty-five families having been allocated to the Canada Colonization Agency, subsidiary of the Department of Colonization and Development, others will be placed in estates erected by the Colonization Branch of the Canadian Pacific and the remainder on farms prepared by the Canadian Pacific under the supervision of the Department of Colonization and Development.

Asked for his personal comment on the scheme, Mr. J. A. Demie, C.M.G., Chief Commissioner of the Department of Colonization and Development, said: "I have no hesitation, whatever, in saying that Mr. Askew's magnificent action is a strong reminder that the whole nation of the movement of the Colonization Branch of the Canadian Pacific to Canada calls for special effort on the part of all organizations and individuals who are in a position to speed up the important task of colonization. As it well known, we have always concentrated our efforts on the settlement of the largest possible number of British settlers to Canada, spending large sums of money in connection, but due to conditions which have existed in the last few years and the administrative difficulties, which seem to arise, now and again, the apparently necessary numerous regulations which have been introduced, result in disappointing."

"The Askew scheme, however, as it is sure to be known in the future, marks a step forward in the progress of British colonization in Canada, and we are greatly pleased, of course, that Mr. Askew should have seen fit to ask us to join in this proposal, which is now making much commendable progress in Great Britain, and will continue to reflect the greatest credit and satisfaction to its sponsor."

Noted British Statesman

Wife of Mr. Amery Is Native Of Ireland

The better half of Mr. Amery is Florence Greenwood, of Whitley, Ont., whose brother is Sir Hamar Greenwood, also a member of the British Parliament and the last man to fill the office of chief secretary for Ireland.

Mr. Amery is short in stature but big in character. He has developed his muscle as well as his brain. He took a "double first" because a don at Oxford. For a spell he was an editorial writer on "The Times" and special correspondent for the paper in South Africa.

He is a member of one of the Birmingham divisions and is a whole-hearted protectionist. It is generally asserted to have been considered by him that in 1923 Mr. Baldwin appealed to the country for a mandate to introduce protection—a mandate which was emphatically refused.

As first lord of the admiralty Mr. Amery was in command of the Singapore naval base scheme. When he was appointed secretary for the colonies and dominion affairs, the title was adopted after his appointment—he reached an office entirely after his own heart, though some of the government newspapers here regarded the appointment with misgiving.

Early last year he concluded six months tour of the empire. One Conservative paper described him at the time as returning "more than satisfied with the result of his first-hand examination of Britain overseas."

Another Conservative organ said he had covered 60,000 miles in point of space, adding it would have to guess how many miles of newspaper type he had covered in point of space.

Carload Of Muskrats

One Thousand Animals Shipped From Oak Lake To Germany

A carload of live muskrats bound for Hamburg, Germany, left Oak Lake at the end of April, via the Canadian Pacific Express, there being 1,000 animals in the shipment.

They were trapped in the Oak Lake breeding grounds and shipped in boxes by the Canadian Pacific, each containing twelve pairs. This is believed to be a record shipment.

Heart Trouble

Hands and Feet Numb and Cold

Mrs. Wm. Fowler, Auburn, Ont., writes—"Several years ago I was troubled with my heart and nerves, so bad, at times, my hands would become numb and cold. My doctor's medicine, for a while, but it did me little or no good. I happened to

advertised and started taking them at once, and continued for some time, and since then I have had no return of my trouble."

The Desert Song

—BY—
VIRGINIA MORTON
Copyright 1929 Warner Bros. Pictures, Inc.
"The Desert Song" is a Warner Bros. picture. It is based upon the story by O. H. Brown, Jr., and the play by O. H. Brown, Jr. and O. H. Brown, Jr.

CHAPTER I

Grossly the copper coin of the sun was tossed by some invisible hand into the coffers of the desert. Now a purple radiance, the burning sands lit the deepening twilight gradually wrapped his cloak about. A few hours before a pure silver moon had been poised in the cloudless daylight sky, but as night descended this assumed a golden red and set in retain, concentrated in its mellow circle, all the glow and color of the desert landscape that was now clothed in a spectral mantle.

Out of the range of the moon's brightness silver stars began to show their glinting lights. A soft cool breeze slowly blew up, shifting the sand drifts into new undulation that stretched to the horizon. The majestic silence was so intense as to be almost audible.

One would have sworn that no human being dwelt within the leagues of the spot. Then all at once out there in the infinity of desert space arose a faint stirring. For a moment nothing was seen, but as the stirring grew into a definite fact of sound under the rich light of the orange moon there appeared a tiny speck where sand and sky met on the desert horizon.

Over the crest of the dunes another speck appeared, followed by countless others. But now the leader was distinguishable as a rider on a fleet-footed horse, followed by a ribbon of other desert cavalymen clad in turbans and wearing long, their rifles held high in their right arms to proclaim their warning spirit.

The swirl of galloping hoofs raising granules of sand in a dusty trail behind them was at first the only sound to break the stillness. But as the last rider came into view over the crest of the distant slopes the voices of a hundred men filled the night singing the pulsing bars of their tribal song, the song of the Rif, these desert outlaws who have scorned the dominion of the alien French.

Far across the desert these riders swept until they reached the crags where they had their secret encampment. Up a short trail their horses climbed to an opening in the rocks that formed a narrow cave. Rifles they dismounted. Some vaulted to where a cauldron was steaming over a fire, the evening meal.

In the fire's light Sid El Kar, lieutenant of the Red Shadow—the leader of the Rif, examined some

messages that the horsemen had brought from scattered members of his tribe. The substance was too blood beset him ventured a worried comment.

"I hope the French don't find us," said the new leader of the Rif, Captain Paul Fontaine.

Sid El Kar uttered a low oriental cry and spat in the sand. "To the devil with him! For five years the troop-eaters have been chasing our head and all they have caught is our tail."

"But," put forward the other, "it is different, this last week since Captain Fontaine has taken command. Three times they have nearly trapped us."

Sid El Kar's mouth framed a contemptuous sneer. He pointed to the tent that lay pitched close to the fire.

"Our Red Shadow is a match for a million Captain Paul Fontaines! There were few faint hearts in the Rif. They had confidence in their prowess as fighters and above all in the bravery of their mysterious and intrepid leader, the Red Shadow. A stranger out of no where, he had come to champion their cause against the tyranny of those who called the dominion of the desert place their own. But against the imperious attitude of conqueror and vanquished. But even against the armed forces of the French nation, the Rif had succeeded in preserving their independence. Now led by this fearless desert hero, the Rif, they defied the rule of the foreigners and defended their desert life against the domination of those who failed to understand their customs or their emotions. Surely the Red Shadow was sent by Mars to protect his children! None knew where he came, but when the signal fires were lit and the Rif appeared as if by magic. Then when the good work was accomplished he rode off, where no one could say.

Attracted by the avary scent of the cooking, other members of the band who had watched their horses bolted toward him, now drew near the fire. To their companions who had remained in camp they recounted the news they had gathered on their latest expedition. The whole town, it seemed, was talking of this Captain Paul Fontaine who, with a band of devilish French soldiers, had set out to discover the Rif's hiding place. General Bireau, commander of the post, was offering him every assistance with additional horses and troops.

They had picked up another juicy bit of gossip, too. Captain Fontaine was in love, madly enamored of a beautiful and chic French girl, Margot Bonvallet, who had recently come out from Paris. Her father, so one said, was a lifelong friend of General Bireau's and it was at his quarters that she was staying—and breaking the heart of every handsome officer in the regiment. But her preference, it was clear, was for Fontaine who had promised her, with a gesture of bravado, that he would bring her the Red Shadow as a prisoner.

The threat caused a wave of resentment among the band. "The Rif would never fall under the power of the French!" "To kill the Red Shadow, Fontaine must kill him!" all shouted one of them lustily.

"May evil spirits possess them, Fontaine and—Margot Bonvallet!" added another fiercely.

All at once their talking ceased. They drew themselves to military attention. For before them stood the Red Shadow himself!

CHAPTER II

Every line of his straight figure proclaimed the fighter. He wore a loose, bright scarlet burnoose, the hood of which he held firmly around his forehead by a white band. He was clad in gleaming black military boots and his sword was sheathed in the scabbard that hung beneath the folds of his cloak. His

chin suggested that his face was as handsome as his physique but one could not be sure of this because his cheeks and eyes were concealed behind a scarlet mask. This, which he always wore, had helped to surround him with an aura of mystery, for even his closest acquaintances had never seen him without it.

With a wave of his hand, the Red Shadow signaled his followers to stand at ease. They relaxed from their military attitude and segregated into small groups. Their leader, who approached Sid El Kar and Hadda, who was another of his trusted fighters in spite of his advancing years.

I overheard this talk of Captain Fontaine," he said, "and I scorn his threats! But I do not like the reference to this girl they call Margot!" His listeners looked up in surprise.

Then he continued, addressing himself to Hadda, "My friend, I want your promise. The sign of the Heart and the Head."

"It is gladly given," affirmed the oriental as he placed his right hand over his heart, then raised it solemnly to his forehead in the desert ritual that signified a sacred pledge.

The Red Shadow lowered his voice to a whisper. "If anything should happen to me, no harm must ever come to Margot Bonvallet."

The two Rif's regarded him with astonishment.

Identity Still Kept Secret

Kaiser's Best Woman Spy Now Inmate of Insane Asylum

"The Madona of Antwerp," Germany's cleverest spy during the World War, who lured hundreds of the ablest allied intelligence agents to their death by the most fascinating of her blonde lure and marvelous blue eyes, has been locked up in an insane asylum at Cologne. The confidential papers in her case state that her illness is considered incurable, but her identity, jealously guarded by year Germans during the war, is not revealed even at this time.

She remains the same mysterious elusive personage who was dreaded and hunted for four long years without success.

Her smile was as enigmatic and wistful as Gloriosa's in the Louvre, of a certain childlike innocence, but as deadly as Borgias poison. Once she had extracted the information she sought from her victims her features grew hard as steel and she looked a deadly fiend.

Rumors during the war that she was of noble Belgian birth. This was due to the fact that she owned a large medieval chateau on the outskirts of Antwerp, which she inherited from 1912 onward. When Antwerp and the surrounding country fell before the German advance of September, 1914, and hundreds of thousands of people fled across the Dutch border, "The Madona" stayed behind and soon revealed herself as having been an agent of the German intelligence.

"Mother, I do not understand," said the perplexed Hadda.

"No," agreed the Red Shadow, "you do not understand me. That is because you are Mohammedans while I am French."

"But," interrupted Sid El Kar, "you are a band leader, you're French, except us two?"

"That is why I am asking this promise of you," insisted their leader. "No harm must ever come to Margot Bonvallet."

"Now, listen, Master," argued Hadda, "after all she's only a woman."

"That is the oriental in you," retorted the Frenchman, "you cannot understand the woman, but let me tell you this, I would not be your leader if it were not for this Margot."

Then for the first time he disclosed to them the motives that had led him, an outsider, to champion the cause of the Rif and their people.

A strange story it was that he told them. Eight years ago in Paris he had fallen in love with this girl, she had refused to take him seriously, had called him a silly boy—he had called in the French army to prove to her that he was a man. He set out from home with a contingent sailing for Morocco, under the command of Captain Fontaine, Captain Fontaine's own father.

This general had been notorious for his cruel and unscrupulous tactics. Sometimes his own men used to refer to him secretly as the Butcher. One day he had commissioned the one now known as the Red Shadow to lead a certain village. The soldier had refused to exercise the unnecessary brutality and his superior had struck him full in the face, cursing him and calling him a cowardly traitor.

He fled to the hills where the Rif's made their lair.

Every Day Circus Day

Capital of Southern Morocco Never Lacks Entertainment

Every day is circus day in Marrakech, the capital of Southern Morocco, in which life goes on much as it did in the days of the Arabian Nights, according to a writer in the "Living Age." The hard-packed, reddish soil is an arena for all the fakirs and entertainers of North Africa, for the city is still the guardian of the old caravan route from the desert's rim to the sea.

Acrobats, snake charmers, story tellers, musicians, and the real, daily and nightly entertainers travelers who are armed with victrolas and who display every again shade from the blondest of the Rifian to the spongy of the pure negro.

Alberta Sugar Beets

T. George Wood, manager of Canadian Sugar Factories, Ltd., at Raymond, Alta., announces that beets are busy in every section of the company's producing territory and that soil conditions are very good.

"We expect to drill in about 10,000 acres of beets which is substantially higher than last season," he said.

Some gift get husbands, and some never learn the art of telling how few wonderful they are.

North: "I like to be alone."

West: "Well, you could stay at home evenings."

Government and Business

Even Smallest Job Sometimes Is Very Costly

A couch in the office of a United States district attorney in a Middle West city was damaged. He notified the custodian of the building, who was collector of internal revenue. He notified the Treasury, The Treasury notified the architect in Washington, who ordered the custodian to advertise for bids. The advertiser cost \$250.

The bids were forwarded to Washington, an award made, the contract signed, and work was done. The cost of repairing the couch was \$354, an inspector was sent to inspect the job. He didn't like it and had a row with the contractor. The chief inspector had to come out. He approved the job. Nine months later the contractor received Uncle Sam's cheque, net \$354.

Britain Not Well Balanced

There is an abundance of oil and opium sales on the world's loneliest island, according to the Rev. R. A. C. Peole, who had just completed several years as pastor of Tristram de Cunha. "We have 150 pounds of opium and five bibles for each island," he said. "Our greatest needs are food, clothing, watches, paint, barometers, and seeds."

Mother: "Have you given pleasure by doing a good deed today, dear?"

Jim: "Yes, I gave Tommy Brown an awful licking."

Mother: "But that was not giving pleasure to another."

Jim: "Yes, you should have seen how pleased his little brother Bill, was."

There's always a trick in it. They sell you a car or a phonograph on credit, and then demand cash for gas and dance records.

Why go to Peru?

When crude oil is so plentifully available here in North America, why does Imperial Oil Limited go 4000 miles to Peru for the crude from which Marvelube is made?

It is because Peruvian crude has lubrication properties which make it particularly desirable as a base for a superior motor oil.

That is why Marvelube is giving aircraft operators longer periods between engine overhauls and a greater margin of safety.

Marvelube meets the needs of the modern high-speed motor, in the city or on the road, because its carbon-free and heat-resistant properties are created by Nature herself.

Let Marvelube give you the benefits of better lubrication. There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. See the Marvelube Chart at Imperial Oil dealers and service stations.

From far Peru comes a better crude to make a better motor oil.

IMPERIAL OIL LIMITED

EVERYWHERE IN CANADA

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tablespoon dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 125 years since its invention. It means that almost instantly, it is the approved method. You will never use another when you know.

It is sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Little Helps For This Week

"Continue in prayer," Colombian B. Z.

Be not afraid to pray—let prayer be right.

Prayer is that constant with prayer; but ever pray.

Though hope be weak, or sick with long delay.

Pray in the darkness if there be no light.

Whatever is good to wish, ask that of Heaven.

Though it be that which you cannot hope to see.

Pray to be perfect, though material forbids the spirit so on earth to be.

But if for any wish thou dar'st not pray.

Then pray to God to cast that wish away.—Hartley Coleridge.

Prayer is ever profitable; at night it is our refuge, in the daytime it is our armor. Prayer is the key to unlock the day, and the bolt to shut in the night. Prayer sanctifies all our actions.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "flu," which is rampant in every country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville. Half a teaspoonful of Nerville in water makes a most efficient gargle. The germ-killing properties of Nerville quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nerville. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to blow-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Interesting Local Items

Mrs. C. T. Hall who has been at her
old home in Ontario, returned home
last Saturday.

The House of David baseball team
will play in Medicine Hat next Mon-
day evening at 6:15.

Julius Hostland of the Alderson
district, died suddenly in the Calgary
hospital last week.

The heavy rains which struck town
last Monday and Tuesday appeared to
be general over the district. They
greatly improved crop prospects.

Miss Thomas Pedraza was among
the successful pupils in Mr. Wood-
ruff's music class to pass the ele-
mentary examinations with honors.

General Branswell Booth, former
head of the Salvation Army, died at
his home at Hadley Wood, England,
last Sunday. He was 73 years old.

Mrs. W. Wheeler met with a pain-
ful accident last week and when she
slipped off the sidewalk and gave her
ankle a bad wrench. She has been
confined to her home ever since.

Mrs. (Rev.) Matheson, formerly of
Redcliff but now of Kimberley, B. C.,
opened last Sunday in town on her way
to Halifax to attend the Authors'
convention being held there next
week. While here Mrs. Matheson
called on a number of her old friends
who were glad to see her.

The Rotary Club of Medicine Hat
entertained the old timers of the dis-
trict to a banquet last Tuesday
evening. Among those from this
district who attended were: John
Rutherford, John Ellis, Jesse Bishop
and Fred Walker. The guests ad-
mired in the district prior to 1890.

A number of ladies gathered at the
home of Mrs. A. R. Baekytne last
Saturday afternoon and gave a shower
for Miss Martin whose wedding will
take place this month. The bride
chose received a number of useful
presents and a very pleasant social
hour was spent.

TWO GOOD SHOWS COMING
TO CAMEO NEXT WEEK

Two more good shows are billed for
the Cameo next week. On Monday
"His Dog" will be shown. This is a
big human story showing a man's re-
generation through the love and de-
votion of his dog. On Thursday the
comedy drama "Oh Kay," featuring
Colleen Moore, will be shown. There
will also be the second episode of
"The Masked Menace." At both shows
there will be good comedies.

We'er Looking For You At

The Alberta Institute

of Co-operation

Leithbridge, June 24, 25, 26, 27

Because you will have:

Four days in which to hear experts on co-operative
marketing, economics and farm problems.
Opportunity to meet the leaders of the farm
movement.

A fine social time including banquet, picnic and
dances.

The men, women and juniors (17-21 years) of rural southern Al-
berta are invited to become members. The registration fee for
men and women is one dollar, and covers attendance at all lec-
tures, admission to the banquet and dance and a copy of the
printed report of the proceedings.

Juniors get in touch immediately with the registrar for
information as to free transportation and accommodation.

M. L. FRENG, Dept. of Agriculture, Leithbridge.

Early registration is imperative to assist in making the banquet
arrangements. For further details listen in over CJOE—
(Publicity Committee.)

Mrs. W. Campeau moved to Cal-
gary last week end with a party of
Medicine Hat friends. The party
will return by train owing to the
bad condition of the roads after rain.
